THE PUBLIC SCHOOLS.

So far as we have heard; the abandonment to a large extent of the old system of examinations in the Richmond public schools meets with the fervent approbation of parents, pupils, teachers and the ral public. It is in the interest of health, and is a blow at the nerve straining and brain-racking method of making fine scholars. The exceptions, where the examinations are retained, are in the sixth grammar grades, just as the pupil is about to enter the High School, and in the graduating classes of the High and Colored Normal Schools and in the sentor post-graduato class. A total abolition of examinations seemed not practical. Most people of robust health and steady nerves have little or no conception of the misery through which some delicately children pass while preparing for their examinations. Many of them work like dogs and suffer agonles of apprehension lest they should fall when the dreaded hour arrives. The strain these particular people are under alone would justify the change that the School Board has made, and which we hope, if possible, may be extended in the future. The advantage will not now be altogether with the skilled and bright

memorizer. A good memory will, of course, count for much, but it will not be everything with the child. The steady, studious, intelligent pupil who does his duty faithfully to himself and to his teachers day by day will have no difficulty in securing promotion, as stated, without having to pass an examination which may weaker his nerves and forever impair his health. Though much has been written concern-

ing the nervous breakdown which so of ten accompanies modern American life, we doubt if sufficient weight ever has been given to the fact that the nerves of hundreds of persons are strained, irreparably strained, in their school days,

some who scarcely know what nerves are, this may seem as if it were the rankest sort of exaggeration, but fortunately there are others better informed who know that what we say is

And so we sincerely congratulate the school authorities and the Richmond publie upon the introduction here of a more sensible method.

From time to time the scholars' pro gress will be tested without notice, and in a manner that will not arouse apprehension or allow "cramming," yet will prove a sufficient stimulus to exertion.

Another thing-there are scores of children who have not been sent to the public schools because of the rigorous examinations which have obtained there With numbers of these, not going to the public schools meant not going to any school. An opportunity will be given now for these young people to prosecute their studies, through a great part of the course free from the dread that has dis-

The newspapers of the State quite generally have commented upon this reform in public school teaching in Richmond, and have lauded it much, and in so doing have echoed the sentiments of this wellpleased community.

WAR TALK,

The most important news from the East is that Bulgaria has called to the colors 20,000 reserve troops who will be sent to guard her frontier.

The policy of Bulgaria seems to be to force the great powers to act. Sometime ago she made an appeal to them to intervene in behalf of the oppressed Christians, and now she follows up that appeal with action-action which shows the earnestness of her purpose.

The result will be, we have no doubt, that the powers very soon will show their hand and announce their programme. We mit a war if they can help it, and they can help it-if they are united!

It would be mere child's play for Bul-garia to undertake a contest with Turkey backed by the "concert of Europe. Either there will be no war, or there will be one of much magnitude. Russia and cause of Bulgaria, and but a few days ago they sent their ambassadors to the Bultan most solemnly to protest against the atrocities perpetrated upon the Chris

garian race in Macedonia and with this end in view, he says, they have proceeded to devastate the country and kill the Bulgarian Christians, driving the survivors into the mountains and forests, where they would either perish of hunger or else cross the Bulgarian frontier and become a burden to the Bulgarlan nation. He, furthermore, charges that the powers have encouraged the Turks, who, on their part, have never stopped a single revolutionary band nor a single individual from crosing the frontier) The Porte, he alleges, was only too anxious to have a pretext for continuing the massneres and the extermination of the Bulgarian people. And the Premier further

garian government is forced to perceive in this execusive mobilisation a clear sign of Turkey's dealer, after she has succeeded in suppressing the outbreak in Macedonia, to attack Bulgaria and exterminate the Bulgarian race. All our latest information from Macedonia and Constantinople confirms this view.

Yesterday came a telegram from Burgar saying that a company of Turkish troops, while passing noar a frontic nost, was saluted by the Bulgarian guard, but the Turkish officer did not acknowledge the sailute, turned his back, and afterwards remarked to the Bulgarian officer in command of the post: "When we have finished here we will come and see you." Reports have also been received of Turkish troops crossing the Bulgarian frontier, carrying off sheep and committing other depredations.

other depredations.

Confronted by such conditions Bulgaria
is forced to the conviction that Turkey
intends to attack her.

The principality of Bulgaria was created by the treaty of Berlin July 18, 1878, and is suzerainty of Turkey under H. R. H. Prince Ferdinand of Saxe-Coburg-which is a Duchy of the German Empire. United Bulgaria has a population of 3,310,713, of which two-thirds are connected with the orthodox Greek Church. The rest are Mohammedans mainly. The capital is Sofis and is a three days' fourney from Lonintion.

about 6,000,000, exclusive of Bulgaria, Eastern Roumella and Bosnia, which jointly have a population of 4,320,140. Turkey, in Asia and Africa, has a population of about 25,000,000 directly under the rule of the Sultan. So one may see at a glance Macedonia against Turkey, though, we suppose, they might expect considerable help from other of the Christian people

SENATOR CLAY'S VIEWS.

Senator Clay, of Georgia, has spoken right out in meeting. He fell into the ands of a newspaper interviewer and it that the Georgia Senator had a tongue not hesitate to use his tongue in giving vigorous expression to said opinions.

that the Southern States "have practically determined to send Gorman delegates to the Democratic National Con vention." And when the probable opposi suggested, he declared that the South was sick and tired of the man Bryan, and that "his occupation as self-constituted be gone as soon as the newspapers had dropped him. "Mr. Bryan is a dead card so far as the South is concerned, and w have sufficient common sense and busito play him off on a prosperous and a

It appears that on June 21st the son of Mr. Marks, now deceased, was trying to protect two little girls from the attack of a dog, when the dog sprang at his throat, in the souffle he received a slight bite on the forearm. Two months later he died in agony. Just before he died he scized his father and kissed him. The father had a sore spot on his tongue said, has been gradually getting worse. The son who is with him in New York fears that he was polsoned by using a hypodermic syringe that had been used

on his decoused brother, We are told that neither one of these men is seriously ill, but their cases afford a new opportunity for observation and for the contribution of facts to the discussion whether there is any such thing as hydrophobia, it being the contention of some that it is merely lock jaw.

The Supreme Court of South Caroline endered a decision the other day that may go a long ways towards settling the matter of minor importance, but which has long been a source of annoyance and the cause of much ill feeling. The court reversed the decision of two lower courts in the case of Fulmer vs. the southern Rallway. The plaintiff declined to pay the excess rate demanded by the conductor on a casa fare and was put off, He sued for damages, of course, and the lower courts went against him, The liable for damages in the case cited on the ground that it has no legal right to charge any excess above the regular fare.

The Raieigh Nows and Observer says:
In delivering the charge at the ordination of a Raptist preacher, Rev. J. B.
Boone advised the young preacher is
avoid "spotted years and streaked
breeches." Of all things in the world,
the poople have less toleration for a
preacher who affects to ape the smart
set in dress.

One farmer in Cumberland has sold his entire crop of cotton, yet to be gathered and delivered, at 10 cents per pound. We can't help believing that gentemen will go down unto his house justified.
